PROFESSIONAL SUMMARY

B.Tech graduate in Computer Science with hands-on experience as a **Python Full Stack Developer Intern** and strong knowledge of Python, OOP, SQL, HTML, CSS, and JavaScript. Developed a Smart Traffic Management System using YOLO and OpenCV for real-time vehicle detection and traffic signal control. Seeking opportunities in Software Development and Full-Stack Development to apply technical skills and grow professionally.

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL, Data Structures and Algorithms
Web Development: HTML, CSS, React, Frontend Development, Backend Development, REST APIs, Responsive Design
Development: Object-Oriented Programming, CRUD Operations, Web Application Development, Version Control
Database: MySQL

INTERNSHIP EXPERIENCE

Python Full Stack Developer Intern **2026 – Current**
SMEC Technologies Pvt. Ltd. – Ernakulam, Kerala

- Develop web application components using Python, JavaScript, HTML, and CSS.
- Build responsive user interfaces with clear navigation and consistent browser behavior.
- Write backend logic for application features and data handling routines.
- Test code changes and fix defects before submitting updates for review.

Python Developer Intern **06/2025**
Systems2Cloud – Kochi, Kerala

- Resolved **3 bugs per sprint** across Python, HTML, CSS, and JavaScript feature updates.
- Developed frontend modules in HTML, CSS, and JavaScript for Python-based web features.
- Integrated backend Python logic with user-facing components to support feature delivery.
- Connected frontend and backend modules within the same web application.

Cybersecurity Intern **01/2025**
Retechnox Technologies LLP – Remote

- Studied cybersecurity threats and ethical hacking concepts through guided internship work and supervised practice.
- Applied ethical hacking techniques in controlled exercises to understand vulnerability assessment.

PROJECTS

Smart Traffic Management System **2025**

- Developed a traffic management system using **YOLO and OpenCV** to detect vehicles and dynamically control traffic signals based on real-time traffic conditions.

Expense Tracker **2025**

- Developed a web application allowing users to log in, add, and manage daily expenses, with data stored and retrieved through a custom backend and database.

Movie Ticket Booking System App **2024**

- Developed an application for browsing and booking movie tickets using Python for backend development and SQL for database management.

EDUCATION

College of Engineering Pathanapuram **04/2026**
Bachelor of Technology – Computer Science Engineering
GPA: 7.36

LANGUAGES & SOFT SKILLS

Languages: English, Malayalam, Hindi
Soft Skills: Communication, Teamwork and Collaboration, Leadership, Presentation Skills, Problem Solving

CERTIFICATIONS

Workshop on Web Designing – IEEE SB PE
Application of Machine Learning Satellite Using Python – APJ Abdul Kalam Technological University
